Technical data sheet

Application

Techno Calc is an ecological limescale remover for professional use. Use this product for periodic, thorough removal of limescale deposits and general cleaning of dishwashers, coffee machines, etc. Techno Calc does not contain any inorganic acids.

Environmental Benefit: All Techno Green dishwashing products are free from chlorine compounds, other halogen compounds, and petroleum-based detergents. All detergents used in these products originate from vegetable sources. All ingredients of non-mineral origin are fully biodegradable. Low impact on aquatic organisms according to OECD 202.

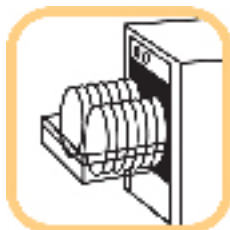

Instructions for use

Prepare a 5% solution of Techno Calc in hot water and allow it to circulate for 30 minutes (or one full cycle in a coffee machine). Allow the machine to drain and then rinse it with warm water. Start a new wash cycle with dishwasher liquid or powder and allow the mixture to circulate until all the acid residues have been neutralized.

Although Techno Calc contains a corrosion inhibitor, it is not recommended for use with chrome-plated or nickel-plated parts. Techno Calc can be applied undiluted to a scouring sponge and used to remove limescale deposits and grime from rubber gaskets.
