

Techno Salt

Regenereezout
Sel régénérant
Regenerating salt
Regeneriersalz
Sal para regenerar lavaplatos

Technical data sheet

Application

Techno Salt is a regeneration salt for dishwashing machines. Use Techno Salt to ensure that you obtain the best possible cleaning results.

Techno Salt does not contain any insoluble particles, and the granule size is monitored constantly to ensure good solubility in the water softener.

Environmental Benefit: All Techno Green dishwashing products are free from chlorine compounds, other halogen compounds, and petroleum-based detergents. All detergents used in these products originate from vegetable sources. All ingredients of non-mineral origin are fully degradable according to the OECD 301 F test. Low impact on aquatic organisms according to OECD 202.

Instructions for use

The replenishment interval for the salt reservoir depends on the water hardness. Check the salt level in the reservoir regularly, or check the visual indicator (if present). The amount of salt needed increases with the hardness of the water, so you must check the salt level more frequently if you have relatively hard water. Keep in a dry place. Always close the package securely after use.

Technical data

| | |
|---------------------------------|-----------|
| Appearance | powder |
| Colour | white |
| Odeur | odourless |
| Relative density 20°C | 1,00 kg/l |
| PH value (concentrated product) | 7,5 |
| Flash point | >100 °C |
| Solubility in water 20°C | good |

Packaging

10kg bucket.
